

# **ORIENT DISPLAY** MAKE THINGS POSSIBLE

Oct 24<sup>th</sup>, 2023

Dear Valued Customers:

Introducing Orient Display's HDMI TFT Display series – plug and play embedded HDMI TFT displays with a USB touch screen interface. All have On Screen Display (OSD) capability for adjusting the display brightness, adjustable high brightness versions and sunlight readable versions. These are wide viewing angle high contrast IPS displays, compatible with a wide range of operating systems including Raspberry Pi, Windows, Linux, and BeagleBone supporting hot plug.

Standard sizes: 4.3" (800\*480), 5.0" (800\*600), 7.0" (1024\*600) and 10.1" (1280\*800).

Orient Display HDMI series are available with resistive touch, capacitive touch, or non-touch versions. With mounting holes or without for more compact control boards. Horizontally mounted HDMI connectors are standard, but optional of vertically mounted connectors are available if needed.

We have many more display sizes ranging from 3.5" to 22" with different resolutions, brightness's, and other features. With a minimal tooling fee to modify our standard HDMI interface board, any size TFT can easily have the HDMI interface. Please contact us for more details.

Please contact us ([info@orientdisplay.com](mailto:info@orientdisplay.com) or [sales@orientdisplay.com](mailto:sales@orientdisplay.com)) for further information and questions.
