

ORIENT DISPLAY

MAKE THINGS POSSIBLE

February 29th, 2024

Dear Valued Customers:

Orient Display develops a universal evaluation kit for our intelligent displays.

Evaluation Kit for AGU and AGN Series Products

- Can be used for firmware burn-in, testing and evaluation for **AGU and AGN** series products.
- USB transfers to UART/TTL232, RS232 and RS485 interface.
- With 3.3V and 5.0V options.
- The power can be supplied by Micro USB (cable included) or DC adapter (for 7" or bigger displays, not included in the kit)
- 10 pin FFC, 4 pin and 8 pin cables included.
- The driver is automatically installed by most computers. If not, please download from our website.

Please contact us (info@orientdisplay.com or sales@orientdisplay.com) for further information and questions.
